PLUS FEATURES

**LED LIGHT** - LED lighting is undoubtedly the smartest solution in terms of energy saving. Expected life is over 20,000 hours, and should last the full life of the hood.

**PERIMETER ASPIRATION** - First developed by Elica, this technology literally turned the market 180 degrees and opened the door to hoods that could be mounted on the wall like picture frames. The technology draws air through a narrowed channel around a face plate, which increases suction, without increasing blower speed or energy consumption.

**CLEAN FILTER ALARM** - When activated, your hood will emit a "beep" signal to let you know when is time to clean your filters. For some models, an intermittent light will remain active until cleaning filter action is completed. See instructions manual to activate feature.

**LONG LIFE FILTER** - One-of-a-kind odour filter, capable of regenerating itself and of lasting up to 3 years, while standard filters have an average life between 3 to 6 months. To maintain these characteristics, the filter only requires simple maintenance: wash every 2 or 3 months with hot water and mild soap (also in the dishwasher at 65 degrees) and dry in the oven for 10 minutes at 100 degrees.

**ELECTRONIC TOUCH CONTROLS** - Enjoy the modern design and convenience of multi-function electronic touch controls, which are discreetly hidden behind sleek black glass, and will illuminate a soft blue when activated.

**REPLACE FILTER ALARM** - When activated, your hood will emit a "beep" signal let you know when is time to replace the carbon filters. See instructions manual to activate feature.
